### 1. Biggest recycled fibre manufacturer and brand

Twinsaver is the largest tissue manufacturer and the **largest user of Recycled paper fibre** in Southern Africa, fibre that's used in our 100% Green Choice range. We only use high quality 100% Recycled fibre grades in our manufacturing process.

### 2. Job creation

All material used in our Recycled fibre range is **collected through informal recycling collectors**, providing **sustainable incomes** to communities in need, while extending the lifespan of landfills.

### 3. Water wise and energy efficient

In the last financial year, we achieved a **5% reduction in the use of electricity** and **over 10% reduction of total water usage** across all manufacturing sites. We set annual targets, which we continuously strive to achieve.

### 4. Sustainability

Our tissue and soap products are **100% biodegradable**. Our toilet tissue is septic tank safe.

### 5. Responsible waste management

The by-product from our 100% Recycled paper manufacturing process is **disposed of in an environmentally friendly manner** i.e. it is used in the manufacture of bricks, as opposed to being sent to landfill sites.

### 6. Recyclable packaging

We use **recyclable poly packaging** across the Twinsaver range to integrate our product usage with our clients' recycling initiatives.
