- 1 **Alphabetical** Names, category, title, description, company name, etc.
- 2 **Numerical** Sequential filing of patient records, batch, project files.  
Generally use the last digit, i.e. 1102 filed on the "2."
- 3 **1-31** Daily follow-up system, file diary, job scheduling.
- 4 **1-52** Weekly bookings, follow-up system.
- 5 **Mon-Sun** File diary  
- file papers relating to work to be done on each day.
- 6 **Jan-Dec** Monthly system  
- follow-ups, bookings, accounts, call schedule.

## ALPHABETICAL FILING

### First Letter

Position the label according to the first letter of the name, surname or category.

Files are placed with "A" starting at the back of the drawer, cascading towards the front. This method ensures that the first letter of every name is always visible. Colour labels can be used to classify every category.

Ideal for:

- Customer Files
- Financials
- Suppliers Information
- Staff Records

First Letter System

### Second Letter

Position the label according to the second letter of the name, surname or category. This is used where there are too many files per letter. Use a different colour label per letter of the alphabet to increase filing and retrieval time.

### Third Letter

Position the label according to the third letter of the name, surname or category. This is used where there are too many files per letter. Use a different colour label per letter of the alphabet.

## NUMERICAL FILING

Position the label in accordance with the last numeric digit on the pre-index scale.

Different colours can be used to distinguish every 500 or 1000 files. This way, retrieval is easy and misfiling is minimised.

Ideal for:

- Patient records
- Vehicle registration
- Claims
- Contracts or projects
- Quotations or invoices

Lateral filing is based on the simple principle that the eye processes colour faster than groups of numbers or letters. In the Lateral Filing System, a colour is assigned to a number, letter or particular item that has meaning. The assignment of colour for each number 0 through 9 and A through to Z, aids in the filing and retrieval of all types of hard copy files.

By placing these colours (letters and/or numbers) in a particular position on a file or folder, a colour band is formed. When these bands of colours are broken, misfiling has occurred.

Therefore, the Lateral Filing System ensures easy retrieval of documents and prevents the loss of information. The search for files is up to 40% faster, returning files saves just as much time, labour costs are substantially reduced and the problem of misfiling is virtually eliminated.

# Why Buy a *Tidy Files* Cabinet?

Tidy Files cabinets are sleek, elegant and ergonomically designed and manufactured subject to established and consistent in-house quality control measures.

But did you know that our cabinets are built with a full steel frame interior and each drawer can hold up to 80kg? This means that our cabinets are fully operational before the unit is cladded.

## Runners

The runners of each drawer are directly fixed to the steel frame and extend 110% when pulled out, ensuring you will always be able to access your documents with ease

## Adjustable Ferrules

The ferrules are adjustable up to 25 mm. Tidy Files installers will adjust your cabinet upon delivery to ensure your cabinet is level.

## Anti-Tilt Mechanism

Safety feature for Tidy Files Cabinets. Only one drawer can be opened at a time.

## Central Locking Mechanism

All units are equipped with a central locking mechanism. The unit locks all the drawers over two points, both the left and right.

On request cabinets can also be split into two parts creating a top and lower sections with each section having its own lock.

## Locally Manufactured

Every Tidy Files cabinet is manufactured and assembled by hand. Meticulous finishing touches and cleaning is done, guaranteeing that you receive a product of the highest quality.

## 10-Year Warranty

We believe in our products and offer a 10-year warranty on all moving parts together with our excellent after sales service.
